

I hope the Commission will seriously find favor and approve RM-10352. I have been an Amateur since 1959. I am a member of the ARRL. I have watched the rules become deluted over the years until, in my opinion the behavior on the bands was becoming most undesirable and certainly not in the Amateur Spirit. Recent enforcement of the rules have made a great impact and taken a big step in restoring discipline to the airways.

I ask that you accept and enact this proposal because without it I believe the band plan will be useless. I support the acceptance of RM-10352 and ask the Commission to do the same to give it some enforcement authority.

Thank you for the opportunity to voice my opinion.
